

AUDAC Touch™ Page

Send paging messages with AUDAC Touch™

Product information:

The AUDAC Touch™ page license unlocks the virtual paging capabilities within AUDAC Touch™. Voice messages can be sent via the app to your chosen zones without having to use the microphone.

Currently, AUDAC Touch™ Page is compatible with the M2 & R2 audio matrix in combination with an APM microphone. In the future, we will extend this to the Atellio family products as well. More details and information on this will follow soon.

*After purchase, you will receive a digital copy of your licence, you will not receive a physical item.
