

Acoustic Echo Cancellation activation

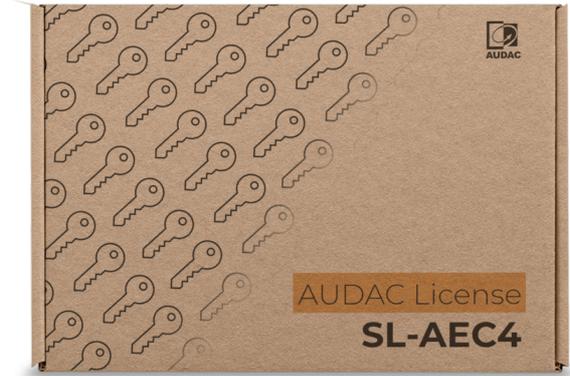

4 channels AEC activation license for LUNA-F

Product information:

The SL-AEC4 is a software extension that activates the Acoustic Echo Cancellation (AEC) feature on the LUNA-F flexible networked audio matrix processors. It enables advanced AEC algorithms for up to 4 independent channels – more than sufficient for most applications, such as when used in combination with a single ceiling microphone tile or other multi-element microphone arrays. This ensures crystal-clear audio by eliminating unwanted echo in conferencing and communication setups.

Technical specifications:

Tail time: 50 ms
Bandwidth: 8 kHz (also known as Wideband AEC)
*After purchase, you will receive a digital copy of your licence, you will not receive a physical item.

Variants:

- SL-AEC4 - License 4 channels AEC activation - Version 1.0 - Digital license
