Product information:

The NWP400 is a Dante™/AES67 network input panel, featuring a USB Type-C port, and an integrated Bluetooth receiver, which can be used to transmit audio signals in a Dante™ audio network.

Various further integrated DSP functions such as EQ, automatic gain control, and other device settings can be configured through the AUDAC Touch™.

The IP-based communication makes it future-proof while also being backwards compatible with many existing products. Thanks to the limited PoE power consumption, NWP400 is compatible with any PoE network-based installation.

Besides the elegant design, the front panel is finished with high-quality fingerprint-resistant glass. The wall panels are compatible with EU-style standard or 1-gang US standard in-wall boxes, making the wall panel the ideal solution for solid and hollow walls. Black and white colour options are available to blend into any architectural design.

Applications:

- null
- null
- Hotels
- Education
- null
- null

Certification:

Dante®   Dante® Domain manager   PoE

Properties:

All-in-one mixing & sound processing

Additional Inputs:

USB   Bluetooth
