

SBAG04

19" portable rack bag - 4 units

Product information:

The SBAG04 is a professional 19" portable lightweight rack bag compliant to ANSI/EIA RS-310D, DIN41491, IEC 60297 standards and can accommodate up to 4 units of 19" equipment with a built-in depth up to 350 mm. Its construction is based on a solid plywood frame which is covered by a strong and water repellent nylon fabric. Both front and rear sides can be opened and closed quick and easily using hook & loop fasteners. The inner frame and lids are padded to provide extra protection to the equipment while the padded carry handle and shoulder strap ensures a comfortable carriage. The 19" slide-on profile for use with clip-on cage nuts ensure a solid and flexible mounting of the equipment. A large side pocket allows all necessary accessories such as cables and adapters to be carried easily together with the equipment, while the rubber feet below prevent the fabric from being damaged when placed on the floor.
