

Highlights:

- 25 AWG stranded conductors
- Spiral shielding
- Parallel & separable wires

Product information:

The SIG series cables are high quality signal cables for indoor, fixed or mobile applications. They have a PVC jacket and are very easy to handle. The inner conductors are fitted with a durable shielding. This gives an excellent protection against interference of all kinds such as electromagnetic fields produced by dimmers, electric motors or power cables. The SIG series cables are "all-round" signal cables which are suited for all kinds of applications where reliable signal transmission is needed.
