

Highlights:

- 26 AWG stranded coaxial
- 5 x coaxial (RGBHV)
- Braided individual & Al-foil overall shielding
- Solid outer jacket (easy pulling)

Product information:

The SVGA52 is a high-end video cable for all high resolution video interconnects. It contains 5 shielded coax cables, all with solid tin plated copper conductors, foamed polyethylene dielectric and braided shielding and an extra overall Aluminium foil shielding with a drain wire for optimum shielding. The coax cables feature a high velocity of propagation and minimal return loss to ensure quality signal delivery on longer connections. The outer jacket is made of special hardened PVC with a flexible core. This ensures a very smooth outer surface, to make the cable slide easily inside electrical tubes. The flexible core maintains the flexibility of the cable. Compatible with Neutrik BNC connector NBTC75BSS5.
