

CRX107

Cable reel bnc female to bnc male

Product information:

The CRX107 is a solid and sturdy constructed cable reel of highly flexible composite video cable with an impedance of 75 Ohm (CXV107). The cable side is equipped with a Reference series male BNC connector while the chassis side is equipped with a female BNC connector. The double braided shielding of the cables ensures a reliable transmission of both analogue and digital video signals. For greater ease of use, the cable reel is equipped with a folding handle and a brake on the drum to prevent unwanted unwinding. Chassis: 1 VCD72 BNC Female
Cable: PROCAB REF BNC Male
