

PMC324

Balanced microphone cable - flex 2 x 0.22 mm² - 24 AWG - HighFlex™

Highlights:

- 24 AWG thin and dense stranded conductors
- Highflex™ solid & flexible jacket
- 0.26 " (Ø) outer diameter

Product information:

The PMC324 is a high-quality microphone cable with a smooth and highly flexible outer jacket. Two 24 AWG (0.22 mm²) conductors consisting of 28 copper strands with 0.10 mm thickness are surrounded by an 92-strand copper spiral shielding with superior coverage. The combination with a smooth and durable outer jacket makes it able to withstand an extreme number of bending cycles.

An optimal signal transmission is guaranteed due to the low capacitance and use of high-purity copper, while the high-coverage shielding provides a great immunity against interference. These features make the PMC324 perfect for use in professional stage & studio applications.
