### Product information:

The PRA522 is a high quality loudspeaker cable constructed using the PLH225 cable and fitted with two Neutrik 2 pole speakON cable (NL2FXX-W-S) conductors. The cable consists of two 2.5 mm<sup>2</sup> (13 AWG) thin and dense stranded conductors. The combination of thin and dense strands with high purity oxygen free copper and the flexible and solid PVC outer jacket makes it the perfect cable for various kinds of applications.

The smooth outer jacket of 9 mm provides great ease of installation for fixed systems while having perfect rolling & unrolling performance for highly demanding Rental & MI applications. An attached shrink sleeve allows custom labeling for easy identification. The cable comes in different lengths from 1.5 meters to 20 meters.
